Dear Ms. Dixon,

As a private citizen twenty-five years ago, I became concerned with the increasing air pollution problems from fossil fuels. After much study, it became apparent to me that automobiles and power plants were two of the chief culprits. Therefore I decided nuclear generated electricity was the way to reduce air pollution and protect our health while maintaining our standard of living.

As a result, I went to work for Virginia Power at the North Anna Nuclear Information Center to educate the public on the benefits of using this energy source. The most persistent question from the public has always been, "Why can't you solve the waste problem?". Virginia citizens support nuclear power and our operation of both the North Anna and Surry Power Stations but they want the spent fuel issue resolved.

1 I am requesting that you continue to seek a solution and expedite the processes necessary to assure that Yucca Mountain is a safe site for the permanent repository of spent fuel.

Sincerely,

Edna H. Musser
Coordinator, North Anna
Nuclear Information Center
